

About Nox Medical

February 4th 2016

Nox Medical develops and manufactures medical devices for sleep diagnostics. The company's solutions are intended for medical professionals, hospitals, and independent testing facilities. The company sells its products through an international network of distributors. Both the distribution network and the users are situated all over the world.

Nox Medical has been growing at a very fast rate since inception. The company employs around 40 entrepreneurial employees, passionate to improve people's health by making sleep diagnostics more simple, efficient and comfortable in all patient groups, especially children. Our team is passionate about using technology to evolve the field of sleep medicine.

Nox Medical currently markets and sells the Nox T3 Sleep Monitor, Nox A1 PSG System, and the Noxturnal Software. It has a full range of sleep diagnostic solutions.
